14 April 1964

SUBJECT: Contract FH-7322 , Proposed Schedule for Spares and AGE Provisioning Conference

Dear Gregg,

Reference is made to our recent Request for Proposal sent to you, and to Exhibit D, Aerospace Ground Equipment, and Exhibit E, Spare Parts Provisioning which were attached. These exhibits specify the procedures to be used in determining the quantities of Spares, AGE, and AGE Spares necessary to support the end items on contract.

In order to establish dates for provisioning conferences with the respective program contractors involved, we ask that you provide us with a recommended date for an initial provisioning conference to be convened at your facility. This meeting will involve the items to be provisioned appropriate to your contract as identified above. Your recommendation for the provisioning conference schedule should include consideration of lead time involved appropriate to the fabrication and/or procurement of the line items provisioned as well as the fact that the delivery schedule to be established at the provisioning conference will anticipate initial on-site deliveries to the operational unit approximately 1 May 1965.

Please advise us, not later than 24 April 1964, of your recommended date for your initial provisioning conference. If further explanation of Exhibits "D" and "E" is required, kindly inform us immediately and we will provide the necessary guidance. It is anticipated that a Provisioning Check List, now in preparation by the Project Support Office [redacted], will be available for distribution to you in approximately ten days. This list will be a useful guide in preparation for the provisioning conferences. After firm provisioning conference dates have been established via this office, the Project Support Office will complete final arrangements and a representative of the PSO will serve as conference chairman.

25X1

Unless advised otherwise by the System Program Office, all inquiries pertaining to this subject should be sent to this office.

Best regards,

STAT
